**Winding&Electrical Performance**

All generator stators are wound to 2/3 pitch. This eliminates triplen harmonics on the voltage waveform and is found to be the optimum design for trouble-free supply of non-linear loads. The 2/3 pitch design avoids excessive neutral currents sometimes seen with higher winding pitches, when in parallel with the mains. A fully connected damper winding reduces oscillations during paralleling. This winding, with the 2/3 pitch and carefully selected pole and tooth designs, ensures very low waveform distortion.

**Quality Assurance**

Generators are manufactured using production procedures having a quality assurance level to BS EN ISO 9001.

**Optional Equipment**

◊ Power factor controller
◊ Manual Voltage Regulator
◊ Excitation loss module
◊ Quadrature Droop kit for Parallel Operation
◊ Winding Protection Thermistors
◊ Temperature Indication RTD's
◊ Air filters
◊ Anti condensation heaters
◊ Diode Failure unit

**Terminals&Terminal Box**

Standard generators feature a main stator with 6 ends brought out to the terminals, which are mounted on the frame at the non-drive end of the generator. A sheet steel terminal box contains the AVR and provides ample space for the customer's wiring and gland arrangements. It has removable panels for easy access.

**Shaft&Keys**

All generator rotors are dynamically balanced to better than BS6861 Part 1 Grade 2.5 for minimum vibration in operation. Two bearing generators are balanced with a half key.

**Insulation / Impregnation**

The insulation system is class 'H'. All wound components are impregnated with materials and processes designed specifically to provide the high build required for static windings and the high mechanical strength required for rotating components.

**Standards**

Newage Stamford industrial generators meet the requirements of BS EN 60034 and the relevant section of other international standards such as BS5000, VDE0530, NEMA MG1-32, IEC34, CSA C22.2-100, AS1359. Other standards and certifications can be considered on request.
